DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 34-40, and 53-64, drawn to semiconductor device.

Group II, claim(s) 13-33 and 41-52, drawn to method of making semiconductor device.

1. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I and II have a common technical features expressed in claims 13 and 41. However, the technical features in claims 13 and 41 do not constitute a special technical feature because they are not a contribution over the prior art. Miller et al. (GB 1223729) cited in the international search report dated September 28, 1999 shows providing an element adapted to hold first and second charges and providing charges to the surface of the element (see Figure 4, page 4).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2826

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Since applicant has received an action on the merits for the product claims 1-12, 34-40, and 53-64, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 13-33 and 41-52 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

2. Claims 1-12, 34-40, and 53-64 allowed.
3. The following is an examiner's statement of reasons for allowance: Prior art failed to establish a planar electron emitter with an element with a first and second surface, means for providing an electric field across at least across at least part of the element where the element comprises a material system to reduce electron scattering by having a predetermined crystal orientation to the first or second surface and by having an impurity concentration of less than 10^{14} cm⁻³ and the material layer has a thickness in a direction at least perpendicular to the first or the second surface, which is equal to or larger than 0.2 micrometer

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
